

# Employee Data Analysis using Excel

Name: S.Dhamini

Department: Commerce

Register No: 312206013

College: vidhya Sagar women's college

**PROJECT TITLE**

# **Employee Performance Analysis using Excel**

# AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Our Solution and Proposition
5. Dataset Description
6. Modelling Approach
7. Results and Discussion
8. Conclusion

# PROBLEM STATEMENT

A problem statement template is a framework that helps you define and communicate a problem that needs to be addressed. It can be used in a variety of

# PROJECT OVERVIEW

• .

A project overview is a comprehensive summary of a project that helps keep everyone involved organized and aligned with the project's goals. It's a central hub for

# WHO ARE THE END USERS?

An end user is a hands on user who actually uses a product on a regular or daily basis. End users are particularly important in product development as they can provide feedback to developers to ensure that software products function properly and are useful to those who need them.

# OUR SOLUTION AND ITS VALUE PROPOSITION

A value proposition is a statement that explains the benefits of a product or service and why it's the best solution for a customer. A value proposition is a key part of a company's marketing strategy and can help differentiate a brand in the market.

# Dataset Description

A dataset is a collection of organized data that can be used for many purposes, including analysis, research, and training machine learning models. Datasets can include many different types of data, such as: Numerical values, Text, Images, Audio recordings, and Basic descriptions of objects.

# THE "WOW" IN OUR SOLUTION

The "wow" in a solution can refer to a variety of things, including:

WOW experiences

These are experiences that customers have when they are amazed by the success of a product or service. For example, a customer might have a WOW experience if they receive great help quickly, or if they leave a business feeling satisfied.

# MODELLING

Data modeling is the process of creating a visual representation of either a whole formation system or parts of it to communicate connections between data points and structures.

# RESULT S

Results Data means answers, scores, results and other information collected or derived from Participants taking Assessment Content. Results Data excludes Assessment Content.

# conclusion

In conclusion, Microsoft Excel is a versatile tool that offers powerful data analysis and visualization capabilities, collaborative features, and automation possibilities.<sup>2</sup>
